

# Sarthak Bora | Applied Data Scientist

United States | [sarthakbora2000@gmail.com](mailto:sarthakbora2000@gmail.com) | 585-625-9140 | [linkedin.com/in/sarthakbora](https://www.linkedin.com/in/sarthakbora) | [Portfolio](#)

## PROFESSIONAL SUMMARY

Data & AI professional with experience of building analytics-ready datasets, applying machine learning to business problems, and delivering scalable insights through dashboards and AI-driven systems. Strong foundation in SQL, Python, cloud-based analytics, and modern data practices, with hands-on experience across analytics engineering, experimentation, and production AI integrations.

## TECHNICAL SKILLS

**Languages & Analytics:** Python (Pandas, NumPy, Scikit-learn), SQL (MySQL, PostgreSQL, SQL Server), R

**Data Engineering & Cloud :** dbt (data modeling, testing), ETL pipelines, AWS (S3, EC2, Lambda, Glue), Snowflake, CI/CD workflows

**BI & Visualization Tools:** Power BI(PL-300 certified ), Tableau, Excel (PivotTables, VLOOKUP, VBA)

**Machine Learning & Experimentation:** Regression and tree-based models, time-series analysis, Hypothesis testing, A/B testing

**AI Systems & Tools:** API-driven AI workflows, natural language processing, LLM-based automation, Git, Airflow, Docker

## PROFESSIONAL EXPERIENCE

**Data & AI Engineer Intern** | [MeshTek Labs](#) | Dallas, Texas

**September 2025 - Present**

- Architected and implemented natural-language-to-JSON workflows using Python and structured prompting, enabling LLMs to trigger device-level actions via REST APIs and reducing manual configuration effort by 30%.
- Refined intent resolution logic by analyzing 10k+ interaction logs and system responses in SQL and Python, increasing reliability across scheduling, effects, and device-control use cases by 18%.
- Validated and deployed AI responses in collaboration with engineering and product teams, supporting scalable rollout of conversational automation for 500k+ of IoT devices.
- Engineered response validation and fallback mechanisms within AI workflows, reducing failed or ambiguous executions and improving end-user trust in AI-assisted controls.

**Data Analyst** | [Rochester Institute of Technology](#) | Rochester, New York

**August 2024 - May 2025**

- Analyzed student performance, attendance, and coursework datasets using Python and SQL, uncovering trends that enabled faculty to proactively support approximately 15% of at-risk students.
- Developed interactive Power BI dashboards to monitor departmental expenses, lab inventory usage, and TA allocation, improving financial visibility and reducing monthly budget variance by 12%.
- Standardized departmental reporting by designing reusable PostgreSQL data models and SQL views used across Power BI reports, reducing ad-hoc data requests and saving 4+ hours per week.
- Assessed academic interventions through exploratory analyses and experimental evaluations, applying statistical methods to communicate findings to faculty.

**Data Scientist (Applied Analytics)** | [SeisoTech Pvt. Ltd.](#) | Pune, India

**January 2022 - January 2023**

- Constructed and maintained analytics-ready datasets in Snowflake using dbt, implementing automated testing and documentation that reduced reporting turnaround time by 20%.
- Modeled customer churn prediction models using regression and tree-based techniques, supporting retention analysis and improving campaign targeting accuracy by 25%.
- Spearheaded experimentation and A/B testing analyses by defining success metrics, analyzing results, and translating findings into actionable recommendations for product and marketing teams.
- Operationalized version-controlled analytics workflows using Git and CI/CD practices, improving data model reliability and ensuring consistent deployments across environments.

**Data Analyst Intern** | [StandardWings Technologies Pvt. Ltd.](#) | Nashik, India

**May 2021 - December 2021**

- Integrated 1.2 TB+ of multi-source fleet data (GPS, sensors, CRM, ERP) into AWS S3 using Python and SQL, enabling operational analysis across 900+ vehicles and supporting near-real-time performance monitoring.
- Formulated and monitored KPIs related to route efficiency, fuel consumption, and SLA compliance, contributing to an estimated 15% improvement in overall fleet efficiency.
- Deployed Tableau and Power BI dashboards that improved operational visibility and data adoption across logistics, operations, and finance teams.

## PROJECTS

**Restaurant Recommendation System Using Yelp Data**

- Designed and evaluated a hybrid recommendation system on 2.5M+ Yelp reviews using BERT sentiment embeddings and SVD collaborative filtering, deployed via Streamlit to deliver real-time recommendations.

**AI-Assisted Business Analytics Copilot (Olist E-Commerce Data)**

- Built an AI-assisted analytics system using Python, SQL, and dbt that translated natural language questions into validated SQL queries over 100k+ transactional records, enabling self-service analytics while enforcing metric consistency and data quality.

## EDUCATION

**MS in Information Technology and Analytics** | [Rochester Institute of Technology](#) | USA

**January 2023 - May 2025**

**B.Tech in Computer Science and Engineering** | [MIT World Peace University](#) | India

**July 2018 - July 2022**
